

A global OEM delivering actuation service solutions

Weir Power & Industrial, manufacturer of Autotork and Hopkinsons actuators, applies its OEM know-how to the provision of full service support for all actuator designs

Before: Actuator prior to refurbishment.

After: Actuator after overhaul and refurbishment by Weir Power & Industrial.

Weir Power & Industrial has been designing and manufacturing Autotork and Hopkinsons actuators for over 60 years. We also have the capability and experience to support engineering changes to actuation design.

Our OEM status enables us to provide engineered service solutions to all types of actuators including electric, hydraulic and pneumatic. We can provide a full actuator overhaul and refurbishment - both in our workshops and on-site - as well as comprehensive spares supply service.

As such, we are fully able to supply replacement Autotork and Hopkinsons actuators.

- Stocked actuators for adaption to specific application
- Extensive spares holding for Autotork and Hopkinsons actuators
- Overhaul of stock actuators ready for outage
- Full refurbishment of 'scrap' actuators
- Breakdown services for critical applications
- Actuator adaption to new and existing valves
- Actuators supplied as a complete tested unit to minimise assembly time at site
- Testing, warranty and certification of all service and repairs
- Innovative service contract structures to meet customer requirements

Weir's expertise in actuator servicing: engineered service solutions to meet customer return-to-service dates
