

A global valve OEM providing excellence in outage and shutdown management

Weir's OEM expertise gives a complete working knowledge of valve design and operation.

Proven leak-free valve outage service

Weir Power & Industrial has extensive experience in delivering valve outage and shutdown projects across nuclear and fossil-fired power stations and petrochemical sites, working on Weir and non-Weir equipment.

Our OEM expertise gives us a complete working knowledge of valve design and operation – as well as a full system understanding. This enables us to provide the optimum level of service based on the current condition of your valve.

Weir has extensive experience in delivering a proven leak-free valve outage service.

Our experience has demonstrated that the following key differentiators have added significant value to our existing customers.

Capabilities

- Proven history of delivering a leak-free valve outage service
- Unique OEM valve inspection and machining equipment
- Proven track record in the planning and project management of multi-disciplined outages
- On-line valve testing and analysis capability
- In-situ seat replacement service
- Dedicated valve and actuator workshop with full testing facilities
- Faro Arm reverse engineering capability

Resources

- Dedicated engineering support located within OEM facility
- All full-time field engineers are IOSH qualified
- Dedicated support staff comprising
 - Planning
 - Resourcing
 - Project management
 - HSEQ
 - Engineering
 - Logistics
- Access to over 200 fully *SQEP temporary personnel
- Continuous investment in training, tooling and equipment
- Fully integrated Health, Safety, Environment and Quality (HSEQ) Management System
- Site specific valve Quality Assurance (QA) Management Database

Values

Our core values are Safety, Quality, On-Time Delivery, Competitive Cost and Service Excellence.

* SQEP = suitably qualified experienced personnel
Weir has dedicated valve and actuator workshops.
