

Sales Bulletin

Weir Valves & Controls USA is pleased to introduce our **Free Flow Rapid Response Program** to supply complete check valves within **16 weeks (or less)** from the date of order receipt. The **ATWOOD & MORRILL FREE FLOW REVERSE CURRENT VALVE®** is the industry standard for steam turbine protection in the global power generation market. Contact us for a worldwide installation list or customer references.

Industry leading standard delivery of sixteen weeks for FREE FLOW REVERSE CURRENT VALVES:

- Sizes: 8" to 28"
- Pressure Classes: 150, 300 and 600
- Materials: Carbon and Alloy Steel

Need it quicker? Expedited lead times and pricing for outage emergent work are available upon request.

The FFRCV is designed in accordance with ASME B16.34 and is available in pressure classes from 150 to 1500. Our offering includes sizes ranging from 3" to 44" in carbon, alloy, or stainless steel materials. WVC USA also offers turnaround within 24 to 48 hours for most FFRCV replacement parts. Contact the factory to discuss your specific needs.
